

ALL NEW!

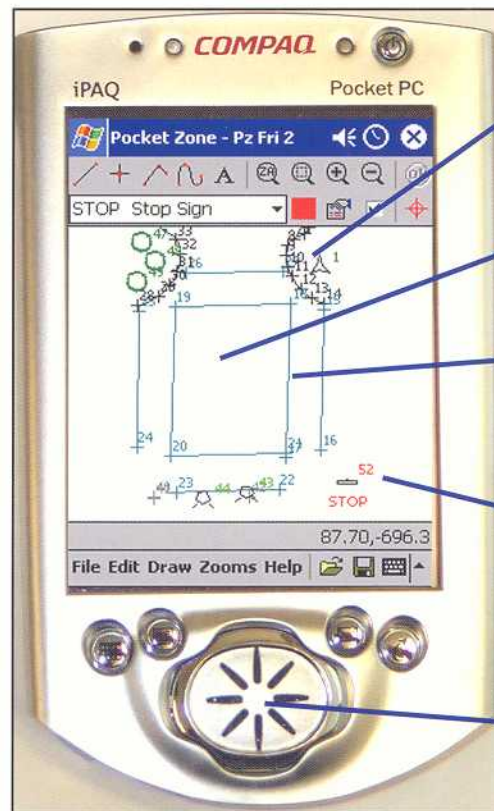

Pocket PC Data Collector

✓ **POCKET ZONE**

Do you ever take measurements at a crash or crime scene? Now, with **The Pocket Zone** software, you can do it faster, easier, and more accurately - *right from your Pocket PC!* **The Pocket Zone** is a data collector that works with your total station or laser device, but it does not stop there. You actually see the drawing as it is being created, so you leave the scene confident that all the details have been accurately measured and recorded.

The Pocket Zone is the only data collector for the Pocket PC which is also a true CAD program!

- **It's easy to learn** - Created just for law enforcement and reconstructionists.
- **It's fast** - One button operation to fire your device.
- **It's automatic** - Automatically connect points with lines or curves. Auto-saves every shot!
- **It's compatible** - Fully compatible with The Crash Zone; also supports AutoCAD .dxf and .dwg!
- **It's easy to read** - Has 20% more space to view your drawing than other Pocket PC data collectors.
- **It's verifiable** - Generate coordinate data text files of all your points.
- **It saves time** - Don't redraw! Open and edit drawings of intersections you previously created.

True 3D line work, including 3D spline curves!

Full Color Display!

Automatically connect points with lines!

Automatically insert symbols with descriptions!

Rocker Shot! One click fires the device, complete with laser sound feedback!

**Worried about learning a new program?
Don't be - all software from The CAD Zone includes:**

- ✓ **FREE** User's Manual with crash scene tutorials.
- ✓ **FREE** telephone technical support.
- ✓ **LIVE ON-LINE** training available over the web!
- ✓ **FREE** email technical support.
- ✓ Additional training available through colleges and a large network of individual trainers.

✓ 30 Day Money-Back guarantee!
